EDUCATION

B.Eng. (Honours) Computer Systems Engineering

June 2025

Brunel University of London

Grade: First

Dissertation: Neural Network Deployment on FPGA for High-Performance Embedded Systems

EXPERIENCE

ELOQUENCE (EU Horizon Project) | *Research Assistant, Brunel University of London* March 2026 – Present

- Building an AI evaluation framework for LLM-based agents, defining metrics for hallucination, robustness, and bias across multilingual conversational datasets using structured test sets and prompt engineering.
- Evaluating agentic AI outputs across diverse prompts for trustworthiness and multilingual consistency, identifying failure modes and limitations in real-world dialogue scenarios.

Nissan Technical Center Europe | *Software Engineer* August 2023 – August 2024

- Developed a full-stack **React.js-FastAPI** app to import test cases into TestRail, reducing manual effort by 60%.
- Led testing strategy for voice recognition features across infotainment systems, collaborating with global teams (Google Automotive Services, Amazon Alexa) for Qashqai MY2024 release.

Indian Institute of Science (IISc) | *Research Intern* June 2023 – July 2023

- Awarded the Turing Fellowship to research human-robot collaboration using computer vision & machine learning.
- Built a hand gesture recognition model using **OpenCV**, **MediaPipe**, and **TensorFlow** achieving **96.67%** accuracy; implemented UR5 robot kinematics in **MATLAB** and **Python**.

Brunel University London | *Summer Student Intern* August 2022 – September 2022

- Built a loneliness prediction model using Google NLP API and ML, achieving ~2 RMSE on the UCLA scale.

TECHNICAL SKILLS

Languages & Frameworks: Python, TypeScript, SQL, React.js, Next.js, FastAPI, LangGraph, TensorFlow
Cloud, DevOps & AI/ML: AWS, GCP, Docker, GitHub Actions, sklearn, MongoDB, Neo4j, LangChain, RAG
Certifications: AWS CCP (CLF-C02), BCS Foundation Certificate in the Ethical Build of AI (Ongoing)

PROJECTS

GitOps-Driven Task Platform | *React.js, FastAPI, SQLite, Vitest, Pytest, AWS, Docker, Github Actions* 🌐

Developed and deployed full-stack app with automated unit tests (**Vitest**, **Pytest**) and CI/CD via **GitHub Actions**. Containerized backend with Docker and deployed to **AWS ECR**; served frontend via **S3+CloudFront** for fast delivery.

Hack the Wallet | *Next.js, Starknet, HTML, CSS, Web3, Gemini API* 🌐

Created an award-winning AI agent game using **Gemini API** and **Starknet (Web3)**, enabling dynamic NPC interaction via natural language prompts and crypto rewards. **Winner** of Encode AI Hackathon (500 + participants).

MediGraph | *Python, FastAPI, Neo4j, LangChain, Next.js* 🌐

Built a full-stack healthcare intelligence platform using a knowledge graph architecture with RAG-based natural language querying. Developed document parsing pipelines and medical desert analysis using FastAPI, Neo4j, and Next.js.

LEADERSHIP/ACTIVITIES

Google Developer Students Club Brunel UoL | *Tech Lead* November 2022 – April 2023

- Led workshops teaching **Data Structures & Algorithms** and organised **HackerRank** competitions.

Brunel University of London | *Course Representative – Computer Systems Engineering* October 2021 – April 2023

- Represented student concerns, coordinated with faculty, and took initiatives to enhance course experience.

AWARDS

2026 NVIDIA Hack for Impact - Winner

2025 University Prize - Awarded for Highest Overall Grade in Computer Systems Engineering

2025 Encode AI Hackathon - 1st Prize Winner (Main Track) + 2x Bounties

2025 Royal Hackaway V8 - 3rd Place Winner in Environmental Hack

2023 Royal Hackaway V6 - 3rd Place Winner

2021 Google Developer Students Club Haxmas Hackathon - Winner (in Education Track)
